Welcome to Hacker101!

Hacker101 is a free class for web security. Whether you're a programmer with an interest in bug bounties or a seasoned security professional, Hacker101 has something to teach you.

Getting Started

Hacker101 is structured as a set of video lessons – some covering multiple topics, some covering a single one – and can be consumed in two different ways. You can either watch them in the order produced as in a normal class (§ Sessions), or you can watch individual videos (§ Vulnerabilities). If you're new to security, we recommend the former; this provides a guided path through the content and covers more than just individual bugs.

Additionally, there are coursework levels where you can hunt for bugs and experiment with exploitation in practice. As you work through the content, try out the coursework to see what you can find!

Sessions

Introduction

The Web In Depth

XSS and Authorization

SQL Injection and Friends

Session Fixation

Clickjacking

File Inclusion Bugs

File Upload Bugs

Null Termination Bugs

Unchecked Redirects

Password Storage

Crypto series

Crypto Crash Course

Crypto Attacks

Crypto Wrap-Up

Vulnerabilities

Clickjacking

Command Injection

Cross-Site Request Forgery (CSRF)

Directory Traversal

Local/Remote File Inclusion
Improper Authorization
Insecure Password Storage
Improper Handling of Null Termination
Padding Oracle
Reflected Cross-Site Scripting (XSS)
Session Fixation
SQL Injection
Stored Cross-Site Scripting (XSS)
Stream Cipher Key Reuse
Subdomain Takeover
Unchecked Redirect
Coursework

Level 0: Breakerbank

Level 1: Breakbook

Level 2: Breaker Profile

Level 3: Breaker CMS

Level 4: Breaker News

Level 5: Document Repository

Level 6: Student Center

Level 7: Guardian

Level 8: Document Exchange
